Planet Skincare: Welcome To The USA!

If you've never watched Absolutely Fabulous, let me just pause for a moment and tell you to quickly get your hands on season one. I found it screamingly funny, and think you will too.

Back to this post. The second I read about these anti-aging products by Planet Skincare, I knew it was the kind of product Patsy Stone of AbFab would fall all over herself to get her hands on. While the character of Patsy and I have little in common, our constant search for the fountain of youth is one similarity.

Why is Planet Skincare beloved by beauty addicts across the pond? They contain synthetic snake-venom (called Syn-ake®) which mimics the results of botox, only it's applied topically!

Instant Firming Serum (\$145, pictured at left) works in conjunction with Anti-Aging Daily Moisturizer (\$115, pictured at right). I've only recently started using this dynamic duo, but am already quite impressed with the results on my skin... especially the pesky little

lines on my forehead. I can't wait to see what the long-term benefits will be!
