

The instant firming serum with Pepha-tight®

If you are looking for an anti-ageing skincare product that delivers immediate, visible results then Planet Skincare's Instant Firming Serum with Pepha-tight® (£75.00) is the product for you. It will leave your skin looking noticeably tightened, firmer and with a visible reduction in fine lines and wrinkles.

Unlike some anti-ageing products that require long-term, continued use to yield visible results, Planet Skincare's Firming Serum's star ingredient Pepha-tight® works instantly. Its unique algae-based formula tightens the skin and smoothes fine lines and wrinkles providing long-term results by strengthening the skin's connective tissue and stimulating the growth of collagen-1.

In-vitro tests carried out on 20 volunteers using a gel containing a 5 per cent dose of the ingredient showed that it enhanced skin tightening by 120 per cent, when compared to a placebo.
